<b>Training Unit:</b>	Neurological Institute of Curitiba - Brazil
<b>Head of Department:</b>	Mr Ricardo Ramina
<b>UK Host Unit:</b>	Great Ormond Street Hospital for Children
<b>Supervising Consultant:</b>	Mr Dulanka Silva
<b>Starting date:</b>	May 6 <sup>th</sup> 2024
<b>Duration of attachment:</b>	30 days
<b>Trainee Report: 100 – 150 words</b>	<p>It was very inspiring to see how the neurosurgical team at GOSH work to provide the best possible treatment for their patients. I was able to attend the various subspecialty meetings and surgeries, which allowed me to experience the complexity of the pediatric neurosurgical field. I would like to make a special mention to the craniofacial team at GOSH, that provide an extensive evaluation of the patient, not only from a neurosurgical point of view, but also with the Plastics and ENT departments. Certainly, it was a very rewarding experience that allowed me to come back to my hometown in Brazil with new knowledge to provide a better treatment and follow up for our patients here.</p>

<b>Supervisor's Comments: 100 – 150 words</b>
